HI 👋 I'M MARKUS.

As a Senior Frontend Engineer with over a decade of experience, I specialise in creating robust and scalable digital products. I excel in full-spectrum frontend development, from design collaboration to infrastructure deployment. My expertise spans React, VueJS, AWS, and modern development practices, ensuring smooth workflows and cutting-edge solutions.

SKILLS

Technical:

- *Frontend Development:* My journey began with HTML and CSS, evolving into advanced JavaScript frameworks. I enjoy building with **React** and **VueJS**, and I've explored Svelte and web components for unique projects. Writing **TypeScript** is a given for me by now.

- *Backend & Infrastructure:* I'm comfortable in **serverless** and JAMStack environments, leveraging tools like **AWS CDK** to streamline development.

- *Design Systems:* I've built comprehensive design systems in both React and VueJS, focusing on reusability and consistency across projects.

- *Tools & Frameworks:* Tools like **Remix.run** and **TailwindCSS** help me create efficient and visually appealing interfaces quickly.

Leadership

- *Team Leadership:* Leading teams through transitions and new projects, ensuring clear communication and cohesive progress both as a Team Lead and as a Tech Lead.

- *Project Management:* From kickstarting new initiatives to steering ongoing projects, I ensure deadlines are met and quality is maintained.

- *Agile Methodologies:* I'm well-versed in various agile frameworks, able to adapt and optimise workflows for different team dynamics. I also enjoy facilitating retrospectives to continuously improve our processes.

WHAT I'VE WORKED ON SO FAR

Senior Frontend Engineer @ zolar GmbH – since 09/2022

Developing and improving a React frontend app for internal and external users to streamline solar rooftop projects.

Collaborating closely with design and backend teams to ensure seamless integration and delivery.

Senior Frontend Engineer (Freelance) – 06/2022 - 08/2022

Provided frontend expertise on multiple short-term projects, utilizing React, VueJS and modern web technologies.

Stealth Startup, working on a cloud PaaS — 04/2022 - 05/2022

Prototyped frontend for AWS SaaS product using React, Remix.run, and TailwindCSS.

Developed Lambda functions in TypeScript and Python, integrated deeply with AWS CDK.

Personal time off — 02/2022 - 03/2022

Took time off to support family during a transitional period.

Team Lead Development @ sum.cumo Sapiens GmbH — 08/2021 - 01/2022

Managed a team of 15 developers through organisational changes.

Implemented explicit career levels and progression plans for the development division.

UI Architect @ sum.cumo Sapiens GmbH — 08/2018 - 07/2021

Set up and kickstarted projects with robust, reusable code foundations.

Worked extensively with VueJS, NuxtJS, and Storybook

Senior UI Engineer @ XING SE — 01/2017 – 07/2018

Helped build a web design system for over 40 product teams, creating a library of 60+ components.

Various roles @ Jimdo — 2012 - 2016

Worked in multiple capacities, from affiliate marketing to UI engineering, evolving with the company's growth.

Junior-Projektmanager Technik, Volontär & Praktikant @ achtung! GmbH — 06/2010 - 12/2011

Assisted in bringing social media concepts to fruition, coordinating between designers and developers.

EDUCATION

Communication Science @ WWU Münster — Magister Atrium, 2011

Practical experience in the student initiative "campus relations", offering PR services to local businesses, headed the initiative for a year.

Worked for agency primus inter pares, handling various communication tasks and building WordPress websites.
